

ReSourceFul

**A friendly web app for
managing external resources**

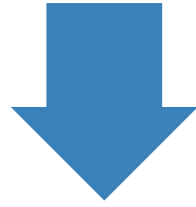

July 2017

1

The Idea

Open Source culture, Ecosystems, Collaborative communities...

Imagine what you're doing inherently depends on "the intelligence of the masses".

You ask people to share their findings, right?

How do you smartly complement the resources in your learning material?

!' means "We've seen this thing and it's very important". '?' means "We've seen this thing and it's not as important" or "We didn't see this thing but it's a good place to start if you want to go beyond what we

**Possible solution:
Put it all in one
place. Make that
place nice and
simple.**

2

The Implementation

Keep it simple

Use Powerful Framework Combos!

BULMA

express

Use Brevity When Possible

(The wonders of ES6)

```
--  
34  const users = {  
35    getAll: () => server.get("/users").then(res => res.data),  
36    getOne: id => server.get(`/users/${id}`).then(res => res.data),  
37    editOne: (id, changes) =>  
38      server.put(`/users/${id}`, changes).then(res => res.data)  
39  };  
40  
41  const items = {  
42    getAll: () => server.get("/items").then(res => res.data),  
43    getOne: id => server.get(`/items/${id}`).then(res => res.data),  
44    editOne: (id, changes) =>  
45      server.put(`/items/${id}`, changes).then(res => res.data),  
46    postOne: info => server.post("/items", info).then(res => res.data),  
47    deleteOne: id => server.delete(`/items/${id}`).then(res => res.data)  
48  };  
49
```

3

The Future

Functionality:

Search, Suggest Subject, Retrieve Password

UX:

More modern comment experience, nested comments

User Accessibility:

Login via original learning platform

Dev Accessibility:

API guide, administrative roles
